Re: In response to your directive of July 14, 1987, concerning the disposal of hazardous materials at Sanitary Landfill Company (IWD) Site, 1855 Cardington Road, Montgomery County, Moraine, Ohio.

To the best of our recollection our company disposals at the above designated site consisted of materials such as brush from tree pruning, broken glass from greenhouse construction, old building polyethylene covers from the greenhouse, building materials (such as old roofing materials and wood products) steel pipes and conduit.

All materials were transported via our pick-up truck to this designated site and unloaded by our personnel. Because of the nature of the trash, we kept no documents as to the specific contents of the truck.

All information contained herein is true and accurate to the best of my knowledge and belief.
